ab initio calculations • energy storage applications
crystal structure databases • software development

Education

2016– **PhD Physics**, University of Cambridge, *Expected graduation 2019.*

2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Distinction.*

2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons).*

Research interests & Experience

PhD **Crystal structure prediction for energy storage applications**

with Dr Andrew Morris

Discovery and computational characterisation of novel high-capacity anode materials for Li and Na-ion batteries, using *ab initio* random structure searching (AIRSS) and related approaches.

MPhil **High-throughput *ab initio* materials discovery**

with Dr Andrew Morris

Database approaches to materials design; wrote a software package, `MATADOR`, to aggregate and analyse the results of first-principles calculations.

MPhys **Electronic structure of defects of graphene superlattices**

with Prof Francisco Guinea

Nearly-free electron model of graphene/h-BN superlattices with arbitrary defects included via Green's function methods. Awarded Tessella Prize for development of a high-performance Python code to perform the computation and analysis.

UG **Interactions of quantised vortices in superfluid helium**

with Dr Paul Walmsley & Prof Andrei Golov *(University of Manchester)*

Spent two summers developing `vfmcpp`, a C++/OpenMP implementation of the vortex filament model of superfluid helium, to study microscopic vortex dynamics and reconnection events [1].

UG **Hard sphere packing of nanotube-encapsulated fullerenes**

with Dr Ho-Kei Chan & Prof Elena Besley *(University of Nottingham)*

Application of a novel hard sphere packing regime to study CNT-encapsulated C_{60} molecules.

Teaching Experience

2016– Supervisor: Part IB Electromagnetism, Dynamics and Thermodynamics, *(Selwyn College).*

2016– Volunteer: Key Stage 2 Code Club *(Ridgefield Primary School, Cambridge).*

2016–2017 Demonstrator: Part IB Computational Physics (C++), *(Cavendish Laboratory).*

2016 Demonstrator: Graduate-level Electronic Structure, *(Cavendish Laboratory).*

2016 Demonstrator: CASTEP Workshop *(Oxford)*, HPC Autumn Academy *(Cambridge).*

2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, *(Manchester)*.
- Provided tuition to small groups and 'looked after children' across 15 schools.
- Helped lead a successful pilot to teach primary school children programming using Scratch.

Computing

Exposure: **Daily**, Intermittant, *Occasional*.

Languages	**Python**, Fortran, C++, *Rust*	Databases	**MongoDB**, *SQL*
Computation	**CASTEP**, Quantum Espresso	Packages	**NumPy, spglib, Jupyter**
Platforms	**Linux**, **nix*	HPC Facilities	ARCHER (UK), Darwin (Cambridge)
Software	**vim**, LaTeX, Inkscape, GIMP	Utilities	**git**, shell scripting, GNU toolchain
Data viz	**matplotlib**, Bokeh, d3.js, seaborn	Web	*JavaScript, HTML, CSS*

Conferences & Presentations

2017 CASTEP Developer Workshop, University of Oxford
2017 13th RSC Conference in Materials Chemistry, Poster Presentation, University of Liverpool
2017 STFC Annual Battery Meeting, Attendee, Abingdon
2017 CCP9 Young Researchers Event, Poster Presentation, University of Cambridge
2016 High Performance Computing Autumn Academy, Presenter, University of Cambridge
2016 SMARTER5, Poster Presentation, University of Bayreuth, Germany
2016 CASTEP Workshop, Poster Presentation, University of Oxford
2016 CCP9 Young Researchers Event, Poster Presentation, University of York
2015 High Performance Computing Autumn Academy, Attendee, University of Cambridge
2015 CASTEP Workshop, Attendee, University of Oxford
